BIOCLEEN for Odor Control & Sewage Treatment

BIOCLEEN is a unique, eco-friendly & user-friendly product of **Indian invention** in powder form. Very useful for sewage treatment without STP. Salient features of **BIOCLEEN** are:

Stops bad smell from sewage, food waste, kitchen waste, biodegradable solid waste, hotels' / restaurants' waste water, fish / vegetable markets, municipal composting yards, mortuaries, etc, INSTANTLY on application.

Turns sewage reusable for gardening, agriculture, ground water recharge, golf course irrigation or for letting into canals, rivers, lakes or sea after few hours' retention and chlorination. After further tertiary treatment, it can be reused for toilet flush too.

No need for Sewage Treatment Plant which is expensive to operate & maintain. Existing STPs (any type – aerobic/anaerobic, whether working, defective or defunct) can be changed over to **BIOCLEEN** immediately, without alterations or modifications. No need to run the STP blowers and hence, there is lot of saving on recurring cost of power, O&M., AMC. Repairs to blowers, motors, starters, etc. and also skilled manpower.

If you have 500 Flats in a housing complex out of which only 300 are occupied, even then, you have to run the STP Blowers 24x7 and the power bill will be huge. Whereas, dosage of Bioclean can be adjusted as per the average daily sewage output.

If you have septic tank, you can apply Bioclean, treat the sewage and reuse it for gardening. There will be no residual sludge and no need for periodical emptying.

Economical – One Kg. of **BIOCLEEN** can treat 1,00,000 liters of sewage per day, costing around Rs.10/- per 1000 Liters. That is, you get non-potable water at Rs.10/- per 1000 Lit. free at site enabling you to conserve fresh water and the pumping / buying cost thereof.

BIOCLEEN is non-hazardous, non-toxic, non-allergic and non-corrosive. **Does not require protective gears to handle.**

BIOCLEEN is easy to apply. Any unskilled worker can do it easily after one time training.

For more details or paid demo. Or paid trial, do please contact :-
Suraksha Greentech Solutions @ 82176 66293.

P.S. BIOCLEEN kills bacteria, E-Coli, Coliform and Corona virus too.
